## Instructions

- Overview Video: <https://youtu.be/xlS-nqFfink>

1. Ensure you've followed the lessons to set up your GitHub, git, and VS Code
2. Fill in the below tasks (note: it'll save as you go)
3. Once everything is filled in, ensure you click "Submit and Export PDF"
4. Upload the PDF to GitHub in a Module1 folder
5. Find the downloaded PDF and move it into the location of your local repository folder (don't use the Github upload option as we want to practice the git commands)
6. Use `git add .` to track all file changes (i.e., the PDF)
7. Use `git commit -m "Uploading M1 PDF"` to record the change and provide a meaningful message
8. Use `git push origin main` to move the changes to the remote repository's main branch (Note: Future assignments will have a dedicated branch name for their work)
9. Take the same PDF and upload it to the Canvas submission

## Task #5 ( 2.22 pts.) - Reflection

Progress: 100%

### Details:

- Did you have any issues/problems this module? If so, what were they and how did you solve them?
- Did you learn anything new this module? If so, provide some brief details.
- If both answers were no, briefly explain your prior background.

### Your Response:

1. The only issue I encountered was updating my jdk file from an old one (17.0.3) to the new one (24.0.2) . For some reason I couldn't figure out how to properly update it even after watching the videos but after some research I finally figured it out. Aside from that everything else went pretty smoothly.
2. I learned a lot form this module. Most of this was new to me. I've worked with Java and github but only wrote code, I never went too in depth like I did during this module.
